NEW COMPLETE GNSS SYSTEMS (below R120k)

- Tri-freq. Algorithm (automatically picking the best 3 from 5 BeiDou Sats for best fix)
- Channels 1598, (for faster and smoother flow – datalink)
- Dual frequency Receivers, receiving two GNSS signals at different frequencies from a satellite
- 5x Active Satellite Constellations (GPS, Glonass, Galileo, BDS, and QZSS)
- Airfix – 5 minutes
- Eagle mode (auto change to radio if network connection gets lost)
- World Survey Coordinate systems included
- Ntrip active (VRS)
- Built-in 0.5 to 2W Radios in all receivers, up to 12Km
- Receivers can be operated as Base or Rover (interchangeable)
- Base and Rover connection, setup base via NTRIP (Hotspot)
- Built-in battery i.e., Rover 15hrs
- Light weight external battery with shoulder strap (not standard with GNSS)
- Powerod (not standard with GNSS)
- Tilt function (IMU) included (maximum 60 deg from vertical)
- WiFi module (configure almost all settings of the receiver, anytime, anywhere)
- Weight 970g/receiver
- Guarantee: one year against faulty material/workmanship.

Saying is, “if it is too good to be true then it can’t be true”, but in this case the saying is wrong!

NOTE: Also available: low-cost quality Total Stations, Levels, Accessories, etc.
